Abstract not available for JP 62000289 (A)**Abstract of corresponding document: EP 0206904 (A2)**

A mixture of at least one α -keto acid or at least one of its salts, a reducing agent, a source of ammonium ions and nicotinamide adenine dinucleotide in reduced or oxidised form is subjected to the action of an enzyme composition which is the product of culture of a single strain of *Bacillus*, and especially *Bacillus megaterium* ATCC 39116. Application in chemical and pharmaceutical industries.
